EXPERIENCE

UI/UX-focused **Multimedia Computing graduate** with practical experience in wireframing, prototyping, UI design, and frontend development using HTML, CSS, JavaScript, Java, and C#. During my internship, I designed user interfaces in Figma, contributed to frontend implementation, and created digital content and training videos that supported the company's social media engagement. Combining creative design with technical development skills, I also have experience with Unity3D and Blender for interactive and 3D projects. Seeking to grow in a UI/UX or junior web development role while contributing to user-focused digital experiences.

EXPERIENCE

UI/UX Designer & Web Development Intern — Moeppi Publishing

August 2025 – January 2026 | Pretoria, Lynwood

- Designed intuitive UI/UX wireframes and interactive prototypes in Figma, translating user needs into functional digital layouts
- Collaborated on frontend design implementation using HTML, CSS, JavaScript, and PHP bringing designs to life with clean, functional code
- Combined creative and technical skills to deliver user-focused digital solutions that support brand visibility and audience growth
- Created newsletters, promotional graphics, and digital awareness content that boosted engagement across the company's social media platforms

PROJECTS

Fintech App — UI/UX Design

Tech Stack: Figma

- Designed a fintech web app with secure user authentication, transaction dashboard, and real-time balance tracking
- Conducted user research and usability testing to refine the app's navigation and improve overall user experience
- Figma: <https://figma.fun/bmgdaj>
